

SPC1+ Navigator v4.0

Statistical Process Control (SPC) Software

Boosts your business above the competition

Access to data is a breeze with *SPC1+ Navigator*. Data are directly

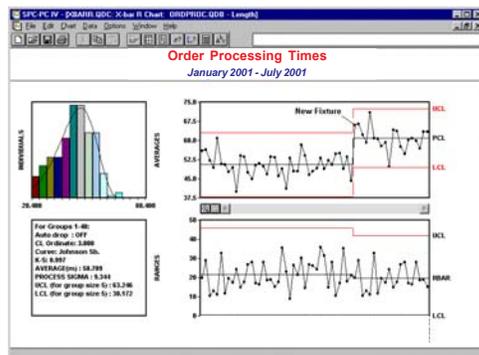

- > accessed from Excel files, allowing anyone to analyze control charts instantly
- > retrieved from a wide variety of gages, automating data collection
- > imported via Microsoft's ODBC, providing open access across multiple platforms
- > entered into a spreadsheet, containing definable calculation parameters

Reporting of data is superior with *SPC1+ Navigator*. Charts are easily

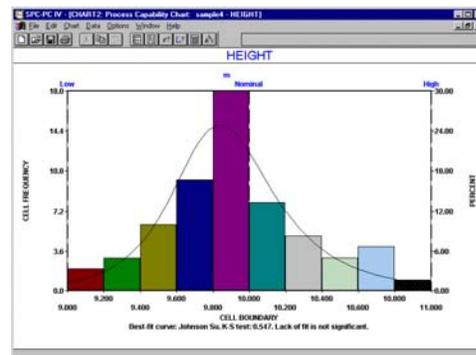

- > published on web pages, permitting authorized personnel to view 24/7
- > embedded in word processing files (such as WORD), producing detailed reports to be shared with vendors, customers and associates
- > annotated, simplifying the identification of problems

SPC analysis features

- > charts for data variables and attributes
- > gage analysis (measurement systems analysis)
- > flowcharting: cause and effect module

order processing times chart

cell boundry chart
